

[EA1-20] UI Error, miss spelt words Created: 10/Feb/25 Updated: 10/Feb/25 Resolved: 10/Feb/25

Status:	Done
Project:	ENSF438: Assignment 1
Components:	None
Affects versions:	1.0
Fix versions:	1.1

Type:	Bug	Priority:	Low
Reporter:	Mariam Ouertatani	Assignee:	Unassigned
Resolution:	Done	Votes:	0
Labels:	Manual		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Description

Program: ATM System
Date: 2025-02-09
Version: 1.0, 1.1 (not fixed)
Report type: UI/Typographical Error
Problem summary: The word " Wood " is incorrectly spelled and should be " Would ".
Reproducible: Yes
Problem and how to reproduce it: <div><div>1. Navigate to the screen where the incorrect text appears.</div><div>2. Locate the word "Wood" in the displayed text.</div></div>
Expected Result: The word should be correctly spelled as " Would " to maintain proper grammar and readability.
Actual Result: The system incorrectly displays " Wood " instead of " Would ".
Reported by: Mariem (2025-02-09)

[EA1-19] You have to enter your password twice if you get it wrong when entering invalid pin Created: 10/Feb/25 Updated:

10/Feb/25

Status:	In Progress
Project:	ENSF438: Assignment 1
Components:	None
Affects versions:	1.0, 1.1
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Mariam Ouertatani	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	Manual		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		

Original estimate:	Not Specified
--------------------	---------------

Description

Program: ATM System
Date: 2025-02-09
Version: 1.0, 1.1 (not fixed)
Report type: Logic error
Problem summary: After entering an incorrect PIN, the system requires the user to enter the correct PIN twice before granting access.
Reproducible: Yes
Problem and how to reproduce it: <div><div>1. Insert and access a valid card.</div><div>2. Enter an incorrect PIN on the first attempt.</div><div>3. When prompted, enter the correct PIN once.</div></div>
Expected Result: The system should accept the correct PIN on the first attempt after an incorrect entry and allow the user to proceed.
Actual Result: The system requires the user to enter the correct PIN twice before granting access, causing an unnecessary extra step.
Reported by: Mariem (2025-02-09)

[EA1-18] [System does not accept the correct PIN when re-entered](#)

Created: 10/Feb/25 Updated: 10/Feb/25

Status:	In Progress
Project:	ENSF438: Assignment 1
Components:	None
Affects versions:	1.0 , 1.1
Fix versions:	None

Type:	Bug	Priority:	Medium

Description

Report no. 37
Program: ATM System
Date: 2025-02-09
Version: 1.0, 1.1 (not fixed)
Report type: Logic error
Problem summary: System does not accept the correct PIN when re-entered and continuously prompts for PIN entry, preventing login.
Reproducible: Yes
Problem and how to reproduce it:

2/11/25, 12:31 PMJira

1. Insert and access a valid card.

2. Enter an **incorrect PIN** initially.

3. When prompted, enter the **correct PIN (e.g., 42)**.

Expected Result:

The system should accept the correct PIN and allow the user to proceed with transactions.

Actual Result:

Even after entering the correct PIN, the system **does not log the user in** and instead **prompts for PIN re-entry again**, preventing access to the account.

Reported by:

Mariam (2025-02-09)

[EA1-17] System does not accept the correct PIN on the second attempt Created: 10/Feb/25 Updated: 10/Feb/25

Status:	In Progress
Project:	ENSF438: Assignment 1
Components:	None
Affects versions:	1.0, 1.1
Fix versions:	None

Description

Report no. 39

Program: ATM System

Date: 2025-02-09

Version: 1.0, 1.1 (not fixed)

Report type: Logic error

Problem summary:

System does not accept the correct PIN on the second attempt and continues to prompt for re-entry instead of allowing the transaction to proceed.

Reproducible:

Yes

Problem and how to reproduce it:

1. Insert and access a valid card.

2. Enter an **incorrect PIN** on the first attempt.

3. Enter the **correct PIN** on the second attempt.

Expected Result:

The system should accept the correct PIN on the second attempt and allow the user to proceed with transactions.

Actual Result:

The system incorrectly prompts the user to re-enter the PIN again, preventing access to the account despite entering the correct credentials.

Reported by:

Mariam (2025-02-09)

[EA1-15] Incorrect transfer amount recorded.

Created: 10/Feb/25 Updated: 10/Feb/25 Resolved: 10/Feb/25

Status:	Done
Project:	ENSF438: Assignment 1
Components:	None
Affects versions:	1.0
Fix versions:	1.1

Type:	Bug	Priority:	High
Reporter:	Mariem Ouertatani	Assignee:	Unassigned

Resolution:	Done	Votes:	0
Labels:	Manual		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Description

Report no. 29
Program: ATM System
Date: 2025-02-09
Version: 1.0, 1.1 (fixed)
Report type: Calculation error
Problem summary: Incorrect transfer amount recorded. The system does not correctly process the entered transfer amount, resulting in an incorrect transaction record.
Reproducible: Yes
Problem and how to reproduce it: <div><div>1. Insert and access a valid card.</div><div>2. Select the Transfer option.</div><div>3. Choose Savings as the source account and Checking as the destination account.</div><div>4. Enter a transfer amount of \$1.11.</div><div>5. Confirm the transaction and review the printed receipt.</div></div>
Expected Result: The receipt and account balances should reflect the correct transfer amount of \$1.11 .
Actual Result: Instead of transferring \$1.11 , the system records and transfers \$0.61 . The printed receipt incorrectly shows: <div><div>• TRANSFER FROM: SVGS TO: CHKG</div><div>• AMOUNT: \$0.61 (incorrect)</div><div>• TOTAL BAL: \$1000.61</div><div>• AVAILABLE: \$1000.61</div></div>
Reported by: Mariem (2025-02-09)

[EA1-14] Incorrect deposited money transaction Created: 10/Feb/25 Updated: 10/Feb/25	
Status:	In Progress
Project:	ENSF438: Assignment 1
Components:	None
Affects versions:	1.0 , 1.1
Fix versions:	None

Type:	Bug	Priority:	High
Reporter:	Mariem Ouertatani	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	Manual		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Description

Report no. 22

Program: ATM System

Date: 2025-02-09

Version: 1.0, 1.1 (not fixed)

Report type: Calculation error

Problem summary: Incorrect balance update after a deposit transaction. The total balance is reduced instead of increasing after a successful deposit.

Reproducible: Yes

Problem and how to reproduce it:

1. Insert and access a valid card.

2. Select the **Deposit** option.

3. Choose the **Checking Account** as the deposit destination.

4. Enter a deposit amount (e.g., \$1.11).

5. Insert the envelope when prompted.

6. Review the printed receipt.

Expected Result: The system should update the total and available balance correctly by adding the deposited amount.

Actual Result: The total balance is reduced instead of increasing. For example, depositing **\$1.11** into an account with an initial balance of **\$100.00** results in:

TOTAL BAL: \$91.11 (incorrect)

AVAILABLE: \$100.00 (incorrect)

Reported by: Mariem (2025-02-09)

[EA1-13] System does not correctly verify insufficient funds Created: 10/Feb/25 Updated: 10/Feb/25

6/16

2/11/25, 12:31 PM

Jira

Report type: Logic error

Problem summary: The system fails to correctly verify insufficient funds in the ATM.

Reproducible: Yes

Problem and how to reproduce it:

1. Start the ATM system with a limited number of bills.

2. Insert and access a valid card.

3. Select the **Withdrawal** option.

4. Choose an amount that exceeds the available cash in the ATM.

Expected Result: The system should display a message indicating insufficient funds and prompt the user to choose a different amount.

Actual Result: The system does not process the insufficient funds but its does not specify the reason.

Reported by: Mariem (2025-02-09)

[EA1-12] Amount deducted from the account does not align with the amount specified to withdraw

Created: 10/Feb/25

Updated: 10/Feb/25

Description

Report no. 12

Program: ATM System

Date: 2025-02-09

Version: 1.0, 1.1 (not fixed)

Report type: Coding error

Problem summary: The system fails to dispense cash and update the account balance correctly after a valid withdrawal.

Reproducible: Yes

Problem and how to reproduce it:

1. Insert and access a valid card.

2. Select the **Withdrawal** option.

3. Choose a valid withdrawal amount that is within the available balance.

4. Confirm the transaction.

Expected Result: The system dispenses the correct amount of cash, prints a receipt with the updated balance, and logs the transaction correctly.

[EA1-11] No 'savings' option for inquiry

Program: ATM System

2/11/25, 12:31 PM

Jira

Date: 2025-02-03

Version: 1.0, 1.1 (not fixed)

Report type: Coding error

Problem summary: After inserting and successfully accessing card 1’s account, when you select withdraw, you can see savings account option, even though this card doesn't have one. It shouldn't show, just like in the inquiry menu.

Reproducible: Yes

Initial State: ATM is turned on and initial cash amount is submitted

Problem and how to reproduce it:

1. Insert and enter correct card number and pin to access card 2 account.

2. Press withdraw.

Expected Result: see both checking and savings options only.

Actual Result: see all three options, even though this account doesn't have a mmkt account.

Reported by: Miri Kim (2025-02-03)
